

Business Case

This project is a fictional case study created for educational and portfolio purposes.

Cloud Migration Project – Luxes Event Venue

Prepared by: Paula Galafassi

Date: August 2026

Executive Summary

Luxes Event Venue is a fictional company that has been operating for four years, providing a premium venue for weddings, graduation ceremonies, birthday parties, corporate events, and other special occasions.

Currently, the company relies on paper-based documentation to manage contracts, customer information, reservations, invoices, and event schedules. This manual process leads to inefficiencies, increases the risk of losing important documents, and makes collaboration between employees more difficult.

This project proposes migrating the company's documentation and reservation management processes to Microsoft Azure. The migration will improve data security, operational efficiency, collaboration, and business continuity while supporting future growth.

Business Need

The company has experienced significant growth over the past four years. As the number of customers and events has increased, the current paper-based system has become inefficient and difficult to manage.

The business requires a modern cloud-based solution that allows employees to access information securely, manage reservations more effectively, and reduce administrative work.

Current Challenges

The company currently faces several operational challenges, including:

- Paper-based contracts and customer records.
 - Manual reservation scheduling.
 - Difficulty locating historical documents.
 - Risk of document loss or physical damage.
 - Limited collaboration between employees.
 - No centralized backup system.
 - Time-consuming administrative processes.
-

Proposed Solution

This project proposes migrating business documentation and reservation management to Microsoft Azure.

The solution includes:

- Digitising all paper documents.
 - Secure cloud storage using Microsoft Azure.
 - Digital document management.
 - Centralised reservation records.
 - Cloud backup and recovery.
 - Staff training on the new digital processes.
-

Expected Benefits

Benefit	Description
Improved Security	Secure cloud storage with controlled access.
Better Collaboration	Employees can access documents from a central location.
Faster Document Retrieval	Digital search replaces manual filing.
Business Continuity	Cloud backup reduces the risk of data loss.
Improved Reservation Management	Easier scheduling and fewer booking conflicts.
Increased Productivity	Less time spent on administrative tasks.
Scalability	Cloud services can grow with the business.

Estimated Budget

Item	Estimated Cost (AUD)
Azure Services	\$3,500
Staff Training	\$500
Migration Activities	\$1,000
Contingency	\$800
Total Estimated Budget	\$5,800

Potential Risks

Risk	Mitigation Strategy
Data loss during migration	Create a full backup before migration.
Employee resistance	Provide training and ongoing support.
Temporary service interruption	Perform migration during non-business hours.
Budget overrun	Monitor project expenses and maintain contingency funds.

Recommendation

Based on the company's current operational challenges and future growth objectives, migrating to Microsoft Azure is recommended.

The proposed solution will modernise business operations, improve document management, strengthen security, and provide a scalable cloud environment capable of supporting Luxes Event Venue as the business continues to expand.

The estimated investment of **AUD \$5,800** is considered appropriate for the expected operational improvements and long-term business benefits.

Conclusion

Migrating Luxes Event Venue's paper-based processes to Microsoft Azure will support digital transformation by improving efficiency, collaboration, security, and business continuity. This project provides a practical and cost-effective solution that aligns with the company's long-term goals while creating a solid foundation for future technological growth.
